DETAILED ACTION

Response to Amendment

- 1. Information Disclosure Statement (IDS) filed 4/16/2007 has been considered.
- 2. This Office Action is in response to the RCE filed 4/16/2005. Claims 1- 5, 21 25 are presently pending.

Allowable Subject Matter

3. Claims 1 - 5, and 21 - 25 are allowed over prior art.

Regarding claims 1 and 21, the prior art of record, in single or in combination, do not disclose explicitly the limitation of a first adder for adding the first weight spread signal to the third weighted spread signal, and transmitting the added signal through the first antenna, and a second adder for adding the second weighted spread signal to the fourth weighted spread signal, and transmitting the added signal through the second antenna. Regarding claims 4 and 24, the prior art of record, in single or in combination, do not disclose explicitly the limitation of a transmit antenna array (TxAA) weight generator for generating a TxAA weight for applying to the downlink shared channel and the dedicated channel by receiving the first despread signal and the second despread signal, wherein the TxAA weight is determined more by the first Node B than by the second Node B; and a transmitter for generating feedback information including the TxAA weight and transmitting the generated feedback information to the first Node B and the second Node B.
